For Immediate Release

Nuance Introduces PaperPort Professional 14

New Release Makes Scanning Easier and Faster, Expands Support for PDF, and is a Universal Desktop for Cloud Services, Including PaperPort Anywhere, Google Docs and Evernote

LONDON, UK., August 2, 2011 — Nuance Communications, Inc. (NASDAQ: NUAN), a leading provider of speech and imaging solutions, today introduced PaperPort® Professional 14, the latest release of the world's most popular scanning and document management application for Windows.

PaperPort 14 expands on the capabilities most valued by its millions of loyal users: fast and simple scanning, easy-to-use document organisation, robust support for PDF, and connectivity to network folders and applications. The new release also includes significant innovations that place PaperPort 14 at the centre of two significant trends driving increases in personal and business productivity through mobile devices and cloud computing.

Scanning is made faster and easier through new Scan-and-Open additions to One-Click scanning, supporting nearly any TWAIN, WIA and ISIS scanning device. Resulting scanned pages are higher quality due to enhancements in image processing. These enhancements increase OCR accuracy by up to 34%. Nuance has also included PDF-MRC compression with the product, which creates industry-standard PDF files that are 8times smaller than regular image PDF files without compression. The product's ability to organise paper and digital documents is greatly enhanced through new folder views, support for Windows rightclick actions and support for Windows 7 jump-lists.

Among the most significant innovations in the new release is the ability to connect with over 20 cloud services, including Google Docs and Evernote, as well as integration with the new Nuance PaperPort Anywhere cloud and mobile service. PaperPort Anywhere lets users automatically store their desktop documents in the cloud, and access those documents via PaperPort 14 on Windows, through web browsers, and using free apps for the Apple iPad, iPhone and Google Android devices.

 "PaperPort 14 is prized by millions of users because it quickly turns piles of paper into organised digital documents, and because it is a better way to organise and use all of your PC files," said Robert Weideman, General Manager and Senior Vice President for the Nuance Document Imaging Division. "The new release will make people even more organised and productive, and turns PaperPort into the universal desktop for documents and files in the cloud. There never has been an easier way to scan, organise and use all of your documents."

PaperPort 14 Key Enhancements and New Features

- **Faster, Easier and Better Scanning:** PaperPort 14 expands on its One-Click scanning by adding new Scan & Open and automatic file naming and folder placement capabilities. PaperPort Scan Enhancement Tools have been expanded to automatically remove black borders and 3 hole punch artifacts, and implements new auto-crop and auto de-speckling capabilities. The product also increases OCR accuracy by up to 34%.

- **PaperPort Anywhere and Cloud Connectors:** PaperPort 14 is the Windows desktop for the new PaperPort Anywhere service, which lets users automatically synchronise their desktop files in the cloud, and access those documents from Windows, Apple iPad, iPhone and Google Android devices. PaperPort 14 also includes Nuance Cloud Connectors, which provides users with connectivity to over 20 cloud services – making it easy to move files to and from the services, and providing powerful scanning and PDF capabilities to those services.

- **Expanded Support for PDF:** PaperPort 14 creates PDF from any application, and has unmatched support for creating searchable PDF files, which benefit from PaperPort's market-leading OCR accuracy. Nuance includes patented and industry-standard compressed PDF-MRC, delivering scanned files that are up to eight times smaller than alternatives.

- **Get Organised Fast:** Organising, finding and using documents is faster and easier than ever with new "Recently Viewed" and "Recently Scanned" navigation. PaperPort also now supports Windows right-click menus, a feature broadly requested by existing users. Users can now select files in PaperPort and use the same right-click shortcuts that are available in Windows Explorer. The product also takes advantage of Windows 7 features, including jump-lists, which provide a fast path to recent tasks.

- **PDF Hover Notes:** In PaperPort 14 the PDF document thumbnails offer more information about PDF documents to save you time so you can focus on important tasks. A large information icon now appears in the upper left-hand corner of PDF document thumbnails, indicating the file contains keywords and descriptive text. Hover over the icon, and it will display the information without needing to open the file.

- **Network Document Access and Security:** PaperPort 14 easily maps to network drives, and the new release locks files in use over the network, enhancing security and collaboration. With PaperPort on every desktop, it's easy to implement centralised document sharing and storage.

Pricing and Availability
PaperPort 14 and PaperPort Professional 14 are available through Nuance's global network of reseller partners. PaperPort 14 is £49.99 and PaperPort Professional 14 is £99.99 for individual users, with volume discounts available through the Nuance Open License Program.
