For Immediate Release

Nuance Launches PaperPort Anywhere Cloud Service

Making it Easy for Millions to Organise, Access and Share All of Their Paper and Digital Documents, Anywhere and Anytime

LONDON, UK., August 2, 2011 — Nuance Communications, Inc. (NASDAQ: NUAN), a leading provider of speech and imaging solutions, today introduced PaperPort® Anywhere, a new cloud-based service that makes it easy to organise, access and share documents from nearly any PC and mobile device. PaperPort Anywhere lets users manage and access their documents in the cloud using web browsers, as well as using free apps from Nuance for Apple® and Google® Android® mobile devices.

The service uses the market-leading Nuance OmniPage® OCR (optical character recognition) engine to automatically create searchable documents from scanned and camera-captured documents, as well as faxes, making paper content as easy to search and find as digital documents. As a result, users can organise, access and share all of their document content on PaperPort Anywhere.

“There is a reason that recent surveys show over 51% of people still use paper files – it is in large part because current cloud services treat paper content as an afterthought,” said Robert Weideman, vice president and general manager for the Nuance Document Imaging Division. “PaperPort Anywhere goes further than other services by closing the content gap between paper and digital documents – making it easy to scan to the cloud, improving the way users manage both their scanned and digital documents, and by making cloud access easy and convenient.”

PaperPort Anywhere also integrates with the new release of Nuance PaperPort 14 for Windows®, the world’s most popular scanning and document management application for the PC, which was also announced today. PaperPort 14 provides automatic synchronisation of Windows folders and files with PaperPort Anywhere. It also adds conversion of scanned and PDF documents into fully formatted word and spreadsheet files that can be edited on Windows, the Macintosh and through cloud services such as Google Docs and Microsoft Office 365. PaperPort 14 provides robust PDF capabilities, including the ability to create PDF from practically any application, and includes PDF-MRC, which creates scanned files that are up to eight times smaller than scanned PDF files without compression.

PaperPort Anywhere is valuable to anyone that works with documents, including the over 20 million registered users of Nuance desktop applications, and users of the more than five million seats of PaperPort that are deployed each year. PaperPort Anywhere includes free apps for Apple iPhone, iPad and Google Android devices, and is free for up to one gigabyte of searchable storage space. PaperPort Anywhere subscription plans include \$9.99 (GBP) per month for 10 gigabytes and \$24.99 (GBP) per month for 50 gigabytes of storage space.

PaperPort Anywhere Key Features and Benefits

PaperPort Anywhere makes it easy to organise, access, and share any document – both paper and digital – anywhere and anytime. Key features and benefits include:

- **Organise All Your Documents in the Cloud.** PaperPort Anywhere is more than cloud storage – it provides a better way to organise and use your documents. PaperPort Anywhere’s thumbnail and clip views of paper and digital documents are key features that help you quickly organise documents.
- **Search and Find both Paper and Digital Documents.** PaperPort Anywhere is powered by the Nuance OmniPage OCR engine, which provides the highest levels of accuracy for scanned documents and image PDF files, such as those from fax services. The best OCR means users can find indexed paper documents just as they do Word and spreadsheet files.
- **Access and Use, Anywhere and Anytime.** PaperPort Anywhere is accessible through any web browser at www.PaperPort.com, the web gateway to PaperPort Anywhere cloud services. Nuance also provides free apps for the Apple iPhone®, iPad® and Google Android devices, and supports Microsoft Windows through PaperPort 14.
- **Share and Collaborate.** PaperPort Anywhere makes it easy to share links to files stored on the site. The service also supports secure and permission-based emailing of files into PaperPort Anywhere accounts, making it easier than ever to collaborate and share documents with others.
- **One Click Scan to Cloud.** Only PaperPort Anywhere integrates with PaperPort 14 – the world’s most popular scanning and document management application for the PC. The combination results in unmatched document productivity and convenience.

Pricing and Availability

PaperPort Anywhere with up to one gigabyte of searchable storage is free. PaperPort Anywhere Premium with up to 10 gigabytes of storage is \$9.99 (GBP) per month and \$24.99 (GBP) a month for 50 gigabytes of storage. For additional information on PaperPort Anywhere visit www.PaperPort.com.

About PaperPort Anywhere

PaperPort Anywhere is a new, innovative cloud service from Nuance that makes it easy to scan, organise and share documents – anytime, from anywhere. PaperPort Anywhere is powered by OfficeDrop. It delivers enhanced search-indexing capabilities using Nuance OmniPage OCR.
