

## News Release

From Nuance Communications, Inc.

**NOT FOR RELEASE**

### **Nuance eCopy ShareScan 5.1 Strengthens Leading MFP Capture Capabilities and Dramatically Lowers TCO for Enterprises**

*Improves Installation, Configuration and Management Experience for Resellers and Customers*

**LONDON, UK., January XX, 2013** – Nuance Communications, Inc., a leading provider of speech and imaging solutions, today announced eCopy® ShareScan® 5.1, the new release of the world's best-selling document scanning and workflow solution for networked multifunction printers (MFPs) and scanners. The new version enhances the ease and flexibility of installing, deploying and using eCopy ShareScan for Nuance partners and their customers.

Installation is now up to 17 times faster, enabling configuration and deployment across multi-server environments in mere minutes, while reducing the total cost of maintenance. eCopy ShareScan runs embedded on the market's leading MFP vendors including Canon, HP, Xerox, Ricoh and Konica Minolta, while also supporting any networked MFP and scanning vendor via eCopy ShareScan ScanStation software. eCopy ShareScan's ability to support any brand MFP and nearly every device makes it an ideal solution for vendors and customers with mixed fleet environments.

For enterprise customers, new features, bundled software, and enhancements to eCopy ShareScan's foundation, dramatically lower the Total Cost of Ownership (TCO) and increase its enterprise readiness. The new release adds flexibility to single sign-on authentication options, and improves scan workflow configurations. These features lead to users spending less time at the device, while ensuring that organisations meet their security standards. A 5x improvement in form processing recognition performance and accuracy of Nuance's industry-leading OmniPage® optical character recognition (OCR) technology better automate customer ad-hoc transaction workflows.

“Many organisations are moving to managed print services (MPS) to gain control of their print and scan environments and achieve value through improved tracking and management of paper-to-digital workflows,” said Michael Rich, senior vice president and general manager of the Nuance Document Imaging Division. “Nuance's new eCopy ShareScan 5.1 release delivers breakthrough performance that offers enterprises greater speed, agility and value in managing their MFP environment, and is designed for quick deployment and high performance.”

eCopy ShareScan is the ideal scanning companion to print management solutions, with seamless integration with products such as Nuance Equitrac®, Nuance SafeCom® and other third-party applications. The power of eCopy scanning and workflow combined with print management

supports key features such as single sign-on, card access, secure scanning, scan audit and cost recovery. Additional new features and benefits of eCopy ShareScan 5.1 include:

- **Faster setup and deployment** – The new Profile Migration Tool reduces set-up time and includes options to export or import ShareScan configurations. A best practices guide helps support the most common migration scenarios, and sample pre-configured workflow exports are provided to enable rapid set up of complex capture processing for resellers and customers.
- **Installation enhancements** – Wizard-driven installer reduces the time to install eCopy ShareScan to as little as seven minutes.
- **Reduced TCO** – eCopy ShareScan 5.1 is bundled with eCopy PDF Pro Office, which allows users to create, view, convert, edit and collaborate with 100 percent industry-standard PDF files, increasing the value and lowering Total Cost of Ownership (TCO).
- **Improved User Experience** – Users can now complete scan jobs at the MFP in fewer steps and with fewer transitions between processes to get jobs completed. It also automates scan-to-self and ad-hoc scanning to reduce time spent at the device.
- **The Most Accurate Scanning** – Improvements to Nuance's OmniPage OCR technology means conversion of documents from paper to digital is fast and accurate. Paper can be converted with the highest level of accuracy into fully formatted Microsoft Word and Excel documents, as well as searchable PDF files.
- **Enhanced Forms Processing Extender** – eCopy ShareScan's Forms Processing Extender (FPE) can now recognise forms five times faster than previously, while also improving recognition accuracy and adding additional Barcode support options
- **Improved Enterprise readiness** – Database improvements enable eCopy Sharescan to fit right into enterprise environments with improved account and permission options as well as improved database clustering support.

### **eCopy ShareScan 5.1 Pricing & Availability**

eCopy ShareScan is available through Nuance's global channel of MFP vendors, partners and dealers. For additional information on eCopy ShareScan, please visit <http://www.nuance.com/for-business/by-product/ecopy/index.htm> or call +1-800-443-7077.
